Other Management Challenges Confronting Interior

Recently, the Office of Inspector General and the General Accounting Office have advised Congress about what they consider to be the major management challenges and other issues facing the Department. Most of these issues have met the FMFIA criteria for, and been reported as, material weaknesses in the Department's Annual Accountability Report. The others, while not meeting the FMFIA material weakness criteria, are receiving priority management attention. These major management challenges and other issues are summarized in the tables in Figures 21 and 22.

Figure 21 Top Management Issues Identified by the Office of Inspector General

Bureau	Top Management Issues	Status/Corrective Actions	Target Date
Departmentwide	Financial Management (previously Financial Management in the Bureau of Indian Affairs)	The preparation of reliable financial statements as required by the CFO Act continue to be a major challenge facing the Department and its bureaus. While the Department has made progress in producing reliable financial statements, several material internal control weaknesses still exist that could impact the Department's ability to produce reliable financial statements in the future.	Ongoing
Departmentwide	Information Technology	The Department is currently participating in a governmentwide review of its physical and cyber-based infrastructure. Reviews have identified significant weaknesses in computer security.	Ongoing
Bureau of Land Management National Park Service Fish and Wildlife Service	Health and Safety (previously Waste Management)	Bureaus are addressing the challenge to ensure that facilities are well maintained and that health and safety deficiencies are corrected in a timely manner. This issue is also addressed in the section below.	Ongoing
Departmentwide	Maintenance of Facilities (incorporates Maintenance and National Park Service)	Department reviews have shown that BLM, NPS, BIA, and FWS have inadequate management controls and insufficient funding to effectively manage maintenance activities. This lack of an adequate standardized automated maintenance management system has severely inhibited the Department's ability to effectively carry out its maintenance management responsibility. The Department has developed an adequate plan to correct the condition.	Ongoing
Bureau of Indian Affairs Territorial and Insular Affairs	Responsibility to Indians and Insular Areas (incorporates Management of Indian Trust Funds and Financial Management in the Insular Areas)	OIG has identified, in our audit reports, over the years, problems in the areas of BIA's trust responsibility, Indian self-determination and self-governance through contracting and compacting, facilities management and roads maintenance, safety management, law enforcement, housing, social services, and education. Audits have shown that long-standing financial management deficiencies continue to exist in the U.S. insular areas. The insular area governments experience difficulties in the areas of financial management, revenue collection, expenditure controls, and program operations.	Ongoing
Bureau of Land Management Bureau of Reclamation Fish and Wildlife Service National Park Service US Geological Survey	Resource Protection (incorporates Range Monitoring and Land Exchanges)	The Department has myriad responsibilities for protecting and restoring our Nation's natural and cultural resources. For example, OSM is responsible for ensuring that coal mining operations are conducted in an environmentally sound manner and for restoring lands damaged by past coal mining practices; BLM is responsible for ensuring that economic and recreational uses of public lands protect the environment and for protecting the wild horse and burro population; FWS is responsible for maintaining a healthy habitat for fish and wildlife resources, particularly endangered and threatened species; NPS is responsible for protecting the natural and cultural resources in parks; and BOR and USGS are responsible for protecting and improving the quality and quantity of the Nation's water. The Department faces growing challenges in these areas as the demand for economic and recreational uses of our lands and water resources increase.	Ongoing

Bureau of Land Management Fish and Wildlife Service Bureau of Reclamation	Revenue Collection (incorporates Revenue Collection and Inspection and Enforcement of Fluid Minerals)	While the Department collects over \$8 billion in revenues each year, audits have shown that the bureaus can make improvements to enhance revenue collections in various programs, including royalties, fee demonstration programs, and cost recovery of reclamation projects. Over the last 3 years, 14 reports have been issued that identified more than \$140 million in lost or potential additional revenues. This amount includes \$71.7 million resulting from the under collection of royalties, \$17.5 million that BOR could have earned if it had identified and sold excess lands, and \$6.6 million that BLM failed to recover for firefighting costs. Also, since 1998, the OIG and the Department of Justice have recovered underpaid royalties of more than \$330 million under settlements with oil companies resulting from OIG investigations.	Ongoing
Departmentwide	Government Performance and Results Act	The Department and the bureaus face a significant challenge in implementing the GPRA requirements for establishing performance goals and measures that effectively demonstrate the accomplishment of their missions. At the request of the Chairman of the Senate Committee on Governmental Affairs, a special review of the Department's implementation of the Act was conducted. The conclusion was that while the Department has made progress in implementing the Act, improvements were needed in some areas.	Ongoing
Bureau of Indian Affairs Fish and Wildlife Service Office of the Secretary	Procurement, Contracts, and Grants	The Department spends substantial resources each year in contracting for goods and services and providing federal assistance to states and Indian organizations. In fiscal year 1999, the volume of procurement activity exceeded \$3 billion, and the Department provided over \$2 billion to states and Indian tribes in grants and other types of federal aid assistance. Procurement has historically been an area subject to fraud and waste governmentwide, and the OIG has received several hotline complaints in this area.	Ongoing
		In its fiscal year 1999 Accountability Report, the Department reported that BIA's acquisition management organization, policies, procedures, and guidelines are inadequate, and has been reporting this material weakness since 1991. The Department also reported that management oversight and accountability in FWS's Federal Aid Program have been ineffective because of the lack of adequate management controls, a centralized audit follow-up program, and guidance governing the administration of the Program.	
		One particular area of concern is the Department's new integrated credit card program, which accounted for more than \$300 million of the Department's procurement expenditures in fiscal year 2000. While this program is expected to substantially reduce administrative costs, there is a greater opportunity for unauthorized purchases because of the limited internal controls in the program. A departmentwide review of this program is currently being conducted.
